Evolution At Variance With The Bible (Author Unknown)

Evolution denies that life was created (Genesis 1).

It denies that the creative work ceased (Genesis 2:2; Hebrews 4:3,10).

Denies God created man – male and female (Genesis 1:26-27; Matthew 19:1-4).

Denies that man is the unique creature of God, distinct from the animals (Genesis 1:26-27; Psalm 8).

Denies that man was originally in a garden implying an orderly, not chaotic, place (Genesis 2:8).

Denies the fixity of 'kinds' in Genesis 1. Evolution overlooks the fact that it is physically impossible for man to cross with animals.

Denies the historical character of the Genesis account.

Denies that man "fell"; refusing to admit that man is a

sinner in need of a Savior (Genesis 3).

Overlooks the difference between human blood and animal blood (Acts 17:26).

Overlooks the distinction of the four kinds of bodies (1 Corinthians 15:19).

The evolutionary geologic record differs from the Genesis account on two major points:

- ✓ Evolution – water animals before land plants. Genesis – Plants on the third day; water animals on the fifth day.
- ✓ Evolution – Reptiles before birds. Genesis – Birds on the fifth day; creeping things on the sixth day.

Denies that, by its emphasis on chance and natural selection, every effect must have an adequate cause (Hebrews 3:4).

Denies that God governs or sustains all things (Colossians 1:17; Hebrews 1:3; 2 Peter 3:7; Acts 17:28).

Evolution is not in harmony with at least three scientific laws:

- ✓ The first law of Thermodynamics (the law of energy conservation). No energy is being created or destroyed. Either matter has always existed in its present form (eternal), or it was specially created at some time in the past.
- ✓ The second law of Thermodynamics (the law of energy deterioration, or the process of entropy). Everything tends to run down, to decay, etc. This says the world came into being at a time not infinitely remote.
- ✓ The law of Biogenesis. All life comes from existing life.

Evolution demands rejection of Jesus's teaching on the treatment of others (Matthew 5:38-39,44).

Evolution denies all Biblical miracles, including the virgin birth and resurrection of Jesus.

Denies that Jesus is the only begotten Son of God (Matthew 16:16).

Denies that the Bible is the special, divine revelation of the mind of God.

Denies the very existence of God!

There is no more reason to believe that man descended from some inferior animal than there is to believe that a stately mansion has descended from a small cottage.
(William Jennings Bryan, at Scopes Trial, 1925)

Scientists Versus God (Selected)

One day a group of scientists got together and decided that man had come a long way and no longer needed God. So, they picked one scientist to go and tell Him that they were done with Him. The scientist walked up to God and said, "God, we've decided that we no longer need you. We're to the point that we can clone people and do many miraculous things, so why don't you just go on and get lost."

God listened very patiently and kindly to the man and after the scientist was done talking, God said, "Very well, how about this, let's say we have a man making contest." To

which the scientist replied, "OK, great!" But God added, "Now, we're going to do this just like I did back in the old days with Adam." The scientist said, "Sure, no problem," and bent down and grabbed himself a handful of dirt. God just looked at him and said, "No, no, no. You go get your own dirt!"

Evidences For The Existence Of God

(A. Cressy Morrison)

By unwavering mathematical law, we can prove our universe was designed and executed by a great engineering intelligence. Suppose you put ten pennies, marked from one to ten, into your pocket and give them a good shuffle. Now try to take them out in sequence from one to ten, putting back the coin each time and shaking them all again.

Mathematically we know that your chance of first drawing one, two and three in succession, one in a thousand, and so on; your chance of drawing them all, from number one to number ten in succession, would reach the unbelievable figure of one chance in ten billion.

By the same reasoning, so many exacting conditions are necessary for life on the earth that they could not possibly exist in a proper relationship by chance. The earth rotates on its axis one

Be Happy

thousand miles an hour; if it turned at one hundred miles an hour, our days and nights would be ten times as long as now, and the hot sun would burn up our vegetation each long day while in the long night any surviving sprout would freeze.

Again, the sun, the source of our life, has a surface temperature of 12,000 degrees Fahrenheit, and our earth is just far enough away so that this 'eternal fire' warms us just enough and not too much! If the sun gave off only half of its present radiation, we would freeze and if it gave half as much more, we would roast.

The slant of the earth, tilted at an angle of 23 degrees, gives us our seasons; if it had not been so tilted, vapors from the ocean would move north and south, piling up for us continents of ice.

If our moon was, say, only 50 thousand miles away instead of its actual distance, our tides would be

planet is an accident. “For every house is built by someone, but He who built all things is God” (Hebrews 3:4).

Falling In Love With God (Kent Heaton)

so enormous that twice a day, all continents would be submerged; even the mountains would soon be eroded away.

If the crust of the earth had been only ten feet thicker, there would be no oxygen, without which animal life must die. Had the ocean been a few feet deeper, carbon dioxide and oxygen would have been absorbed and no vegetable life could exist. Or if our atmosphere had been much thinner, some of the meteors, now burned in space by the millions every day, would be striking all parts of the earth, setting fires everywhere.

Because of these and a host of other examples, there is not one chance in millions that life on our

When a young man and a young woman fall in love, they deeply desire to know everything about the other. They will spend endless hours talking with one another and learning all they can know about the other. At first, they are strangers. In time, through years of marriage, they walk so completely together they finish one another sentences, think similar thoughts and become one in spirit.

Loving God is important but it is possible to love God and not be in love with Him. Falling in love with God is desiring to spend endless hours with Him, talking to Him, and knowing all there is to know about Him. Fall in love with God – again.
